

THE CONCRETE MD

Curing the World's Poorest Concrete

Mixing with Shovels Must Stop!

It is nearly impossible to mix consistent concrete on the ground with shovels.

If we want to cure poor quality concrete we must replace the shovels with a batch-fed mixer.

The Concrete MD uses measured batch-boxes to insure a consistent recipe of concrete ingredients. The counter-rotating mixing auger then turns and blends the mixture better than shovels could ever hope to.

Turning Quality Into Concrete

Cart-Away Concrete Systems, Inc.

The Concrete MD

CONCRETE™ MD

- Dependable Hydraulic Power
- Simple Auger Controls
- Easy Discharge Door
- Bucket & Wheelbarrow Dump Heights
- Interchangeable Batch-Buckets
- Recipe Counting System
- Forklift Pockets
- Cement Bag Breaker
- Debris Safety Screen
- Heavy Duty Bearings
- 2-Ply Industrial Rubber Mixing Area
- Metal-Alloy Auger Protection
- 10ga. Steel Construction
- Stackable Design to Ease Shipping
- 720 lbs (mixer unit)
- 400 lbs (power unit)
- 35"W by 45"H by 81"L (shipping)
- Gas Standard / Diesel Optional

Patents Pending
