SKID MOUNT MIXER

PORTABLE CONCRETE MIXER

MIXING VERSATILITY

This Skid-Mount Mixer uses the same proven mixing technology as the Cart-Away Concrete Mixing Trailers. Simple and compact design has been a Cart-Away tradition since 1993.

These mixers are mounted on a steel frame that allows you to choose your mounting application. Set it on the ground, or on a platform, or move it around with a forklift, or mount it on a truck/trailer. A simple control panel allows the drum to spin in two directions and tilt to dispense. Powered by Gas (standard), Diesel, or Electric driven hydraulics.

The Skid-Mount can be ordered with a TopLoader option that turns the mixer into an All-in-One Batch Plant.

OPTIONS

- TopLoader
- PortaWash
- Discharge Chute
- Hour Meter
- Electric Start
- Diesel Engine
- Cart-Shield
- PortaLoader System
- SplashGuard

SPECIFICATIONS

Mixing Capacity:	1-3/4-yd or 1-1/4 yd
Drum:	Precision rotating drum
Finish:	Powder-coated
Engine:	13 HP Engine
Gearbox:	Extreme Duty Gearbox
Hydraulic Drive:	Hydraulic Motor
Speed Control:	Gearsaver Speed and Direction Control
Hydraulic Valves:	Uni-Body Hydraulic Valves
Frame:	Tubular A36 Structural Steel
Fork Pockets:	Fork Pockets
Hydraulic Pump:	8 GPM Hydraulic Pump
Hydraulic Lines:	Steel reinforced hyd. pressure lines
Dimensions:	11'2" L x 4' W x 6' H
Empty Weight:	2450 lbs (1-3/4 yd) 2250 lbs (1-1/4 yd)

A batching system PERFECT for remote projects!

- Precast Concrete
- Remote Concrete Batching
- Ready-Mixed Delivery
- Custom Material Mixing
- Trailer or Truck Mounting

TOPLOADER: THE ALL-IN-ONE OPTION

The Cart-Away TopLoader is a convenient option that turns the skid mount portable concrete mixer into an all-in-one field mixer and an overhead conveyor with mounting legs attached to the tilt-frame of either a 1.25-yard or 1.75-yard Skid Mixer.

The conveyor provides a way to load your sand, gravel, and cement into the drum without separate loading equipment. This creates an all-in-one portable batch plant. There is a hook-up for water with a digital water meter to measure your water content in the drum.

You can use a tractor bucket or a super-sack to load this useful mixer option. Ask your Cart-Away mixer specialist about creating the perfect field mixer with the TopLoader option.
