

The LoadPro Advantage

The LoadPro comes with a simple start-up system that provides efficient loading for Cart-Away mixing trailers. Purchasing a LoadPro is a small investment which allows operators to enter the ready-mixed concrete business with quick return on investment. This portable batch plant provides a functioning concrete system that can be installed in restricted spaces and has a user-friendly design with no need for permanent slabs or hook-ups. The LoadPro be moved to remote locations for convenient operating. The platform of the LoadPro is designed to be easy to load, simple to maintain and operate and offers easy access to the cement bag breaker.

Metered Water · Fast Loading · Cement Bag Breaker · Gas Powered Hydraulics
